

Managing Landscape Trees

Friday, 3 April 2015, 2 -5 PM

**If you install and maintain landscapes, trees, and lawns or offer pest control
this class is for you.**

Trees are the most valuable features in many landscapes, and clients have high expectations for their care. This class covers the most up-to-date research and industry standards for managing landscape trees.

Topics:

- Selecting and planting high quality trees;
- Pruning for good structure;
- Maintaining vigor;
- Managing common insect pests and diseases;
- Invasive plants of concern and management strategies

Location:

- At the Anchorage Cooperative Extension Service Office, 1675 C St, #100.

Presented by:

Alaska Division of Forestry Community Forestry Program:

- **Stephen Nickel**, Community Assistance Forester and International Society of Arboriculture Certified Arborist.

University of Alaska Fairbanks Cooperative Extension Service:

- **Jessie Moan**, Integrated Pest Management Technician.
- **Gino Graziano**, Invasive Plants Instructor.

There will be time for discussion so please bring questions. A field session will follow the lectures, so dress for the weather.

No charge but registration is required and classroom space is limited. Certificates of completion and ISA CEUs will be available.
